

Module 6

This module is where you deliver the complete course with all the modules gathered into one document. This demands that you edit the PLR version of the book to suit your own needs first. The editable PLR version is found inside the product folder. When finished editing in your necessary adjustments, upload the complete pdf document to the web, get the link and place it in the last email.

If you need help with rebranding the product or setting it all up, just contact me and we can have a conversation no-strings attached.

We do offer a service where we set it all up for you in no time! We also help people with rebranding of PLR products just like this one.
