

# WP Master Lock Funnel Setup

To setup the WP Master Lock funnel is very easy to do and only takes a few minutes. Just follow the instructions below to get started.

1-Open up your index.html page in any text or html editor.

2- Scroll down the page and look for your autoresponder optin form code as shown below.

**Note this example references Aweber, you can use the equivalent code from your current autoresponder provider if different.**

<!--Optin form starts here-->

```
<form method="post"
action="http://www.aweber.com/scripts/addlead.pl"><input
name="meta_web_form_id" value="1633918239" type="hidden" /><input
name="listname" value="wpmlock" type="hidden" /><input
name="meta_adtracking" value="Form1" type="hidden" /><input
name="meta_split_id" value="" type="hidden" /><input
name="redirect" value="http://wpmasterlock.com/loading.html"
type="hidden" /><input name="meta_message"
value="1" type="hidden" /><input
name="meta_required" value="from" type="hidden" /><input
name="meta_forward_vars" value="0" type="hidden" />
<table id="table85">
<tbody>
```

Add your autoresponder form ID  
value here as shown.

Add your autoresponder list name  
value here as shown.

Add the domain name where you will  
be installing the wp master lock  
funnel here.

3- All you have to do is change the 3 yellow shaded areas as shown above replacing it with your own information, and then click save.

4- Next, open up your loading.html file and place your affiliate link into the code as shown below in the yellow shaded text, then click save. Note this can be any affiliate or product offer you like.

```
<title>WP Master Lock</title>
<link rel="stylesheet" href="stylesheet.css"
type="text/css" />
<meta http-equiv="REFRESH"
content="5; url=
http://jvz7.com/c/1461/20094" />
</head>
<body>
```

Add your affiliate link here.

5- Setting up the confirmation page – this is an optional step, you can have your subscribers redirected to another offer after they confirm their email address by setting up your confirmation success page in your autoresponder as shown here. This can be any page you want or just leave blank if you don't want to use this feature.

3 Success Page

What page of your website do you want to send people when they confirm?

Confirmation Success Page URL

☐ Pass subscriber info for [personalizing](#) this page. (Not recommended for WordPress users)

Save Settings

All you have to do here is replace the affiliate code as shown here in the example below with your own affiliate ID and product. This can be any product you would like to promote or just keep the same one I have here. This particular product is a Clickbank product called Backup Creator that backs up and protects your Wordpress sites. Just open up the confirmation.html file and scroll down to line 31 where you will see the code below and replace it with your own.

```

<tr>
  <td align="center" background="images/m2.png"
width="400">
  <p><a
href="http://e682d8i015yx8tf1pxujr0fa37.hop.clickbank.net/%22%20target=%22_top"></a></p>
  <p class="p" align="center">

```

Add your affiliate link here.

6- Exit Splash Script – your squeeze pages include an exit splash script that can be used to redirect anyone who tries to leave your page to a another page or offer of your choice. The default setting is set for the squeeze2 page but you can change it to whatever you want. Just change the exit location that is highlighted below to your desired page.

```

<!-- Start of ExitSplash.com Code -->
<script language="javascript">
var exitsplashalertmessage = '*****\n\n >>> WAIT <<
<\n\n CLICK THE ***CANCEL*** BUTTON\n on the NEXT Window for Something\n VERY
Special!\n\n*****',
var exitsplashmessage = '*****\n\n WAIT BEFORE YOU G
O !\n\n CLICK THE *CANCEL* BUTTON RIGHT NOW\n TO STAY ON THE CURRENT PAGE.\n\n I HAVE
SOMETHING VERY SPECIAL FOR YOU!\n\n*****',
var exitsplashpage = 'squeeze2';
</script>

```

7- Just repeat these exact same steps for the squeeze page 2 index, loading and confirmation html pages and you'll be good to go.

8- Next using your favorite ftp method upload your sales funnel files including the Report.pdf to your domain and ready to go.

9. Next, test out your funnel and make sure everything is working correctly.

**That's it! The setup for this funnel is very easy but if you have any problems just contact the support desk below for help and we'll get back to you as soon as possible.**
