Duplicate An Artboard

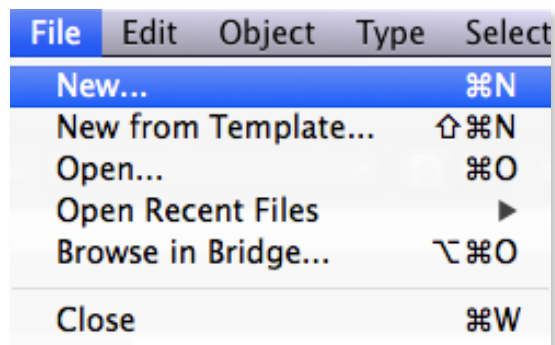

HOW TO DUPLICATE AN ARTBOARD IN ILLUSTRATOR

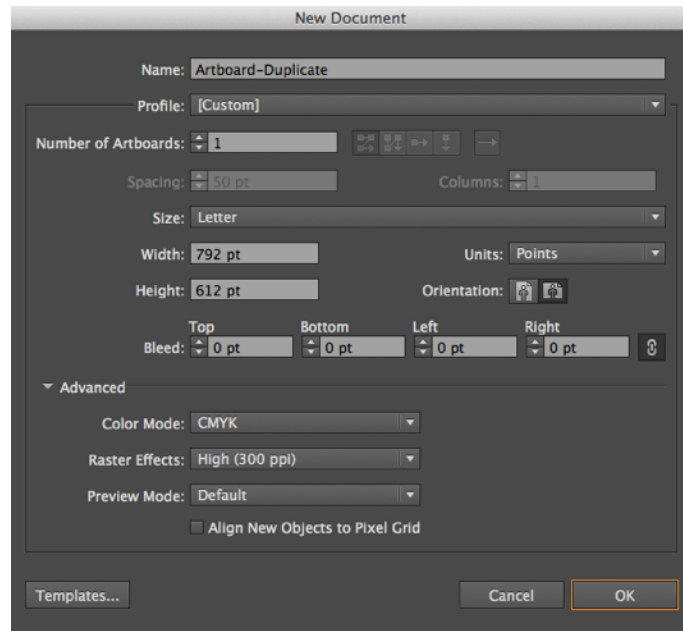

Duplicating an Artboard to extend and add more workspace for your design and document is very easy with Adobe Illustrator. Below are the steps on how to duplicate art boards easily.

Use the Artboard Panel

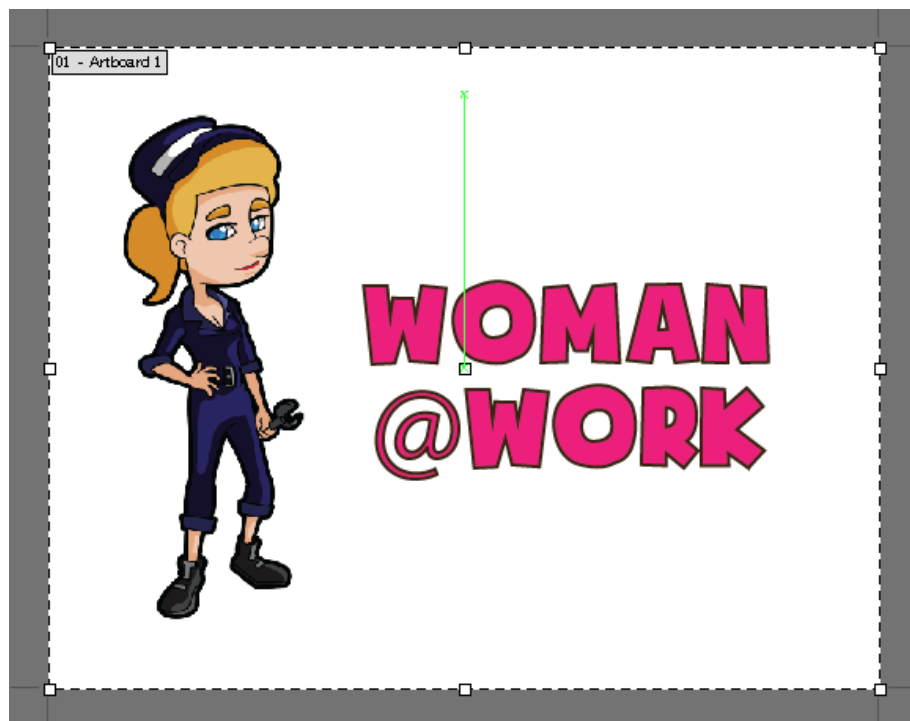

1. Create a new art board by opening a New Document. Click on FILE -> NEW.

2. Supply necessary details for your NEW DOCUMENT. In this example we are going to create a single blank letter size art board.

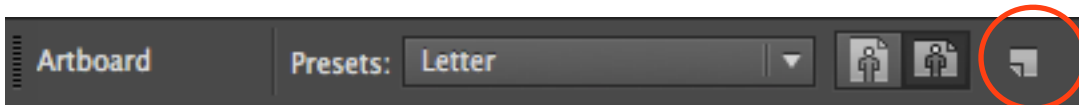

3. In your newly opened artboard, start creating or editing your work.

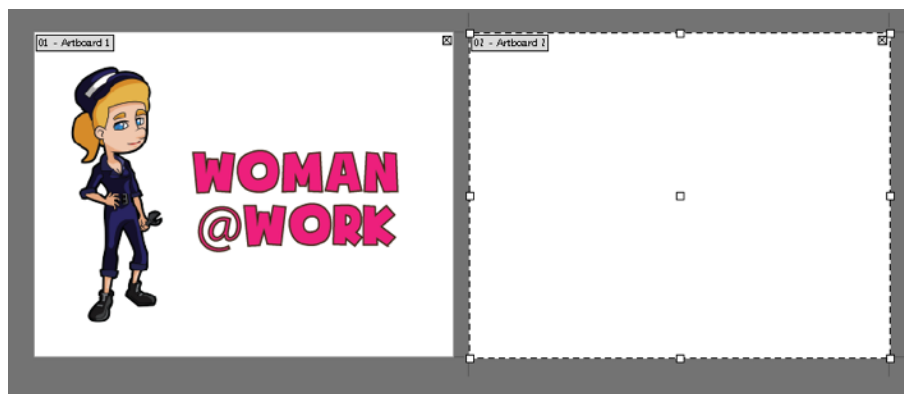

- Once done and you feel like you'd like to add another art board of the same size, you can do so by selecting the ARTBOARD TOOL located at the left side toolbox.

- Once the ARTBOARD TOOL has been clicked, select the ARTBOARD that you'd like to copy.
- In the ARTBOARD TOOL located at the top part of the window, select the NEW ARTBOARD button.

- After clicking on the NEW ARTBOARD BUTTON, go back to your workspace and you'll see that the ARTBOARD you've selected has been duplicated, but is still floating in your workspace. Place it anywhere beside the original art board and once settled with the place, click your left mouse button. Use zoom in and zoom out to get a better view of your artboards.

- Your DUPLICATED ARTBOARD is now in place. You can add more elements such as stock vector graphics to make your design more appealing and fun.
- You can repeat steps 4-6 to duplicate more artboards.
